

System for Floor Repair

System for the repair of floor surfaces exposed to severe mechanical loads

Brief description:
The multi-use floor repair system includes all products needed for the repair and leveling of floor surfaces subject to severe mechanical loads. Repairs to layers between 3 and 80 mm can be carried out in one step, both indoors and outdoors. This special mortar is self-leveling and can be used directly as a wear course.

Areas of application: warehouses, production plants without exposure to chemicals etc.

System benefits:

- Especially economical construction of highly stressed floor surfaces
- Leveling of irregularities

Worksteps	Products
Primer	1 PCI Gisogrund® 404 Wash primer for absorbent and non-absorbent substrates
Floor leveler	2 PCI Zemtec® 1K (interior) Cement based floor leveler for residential and commercial buildings PCI Zemtec® 180 Pourable screed for direct use as bonded screed
Top sealing	3 PCI Zemtec® Top Aqueous PU sealing, 2 components for PCI Zemtec floors
